Summary:

A highly motivated data scientist with a strong foundation in machine learning, data visualization, and data-driven problem solving. Experienced in building ML models using Python, Pandas, and Scikit-Learn. Skilled in writing efficient SQL queries and performing data analysis with Excel. Adept at using Git for version control and containerizing projects with Docker.

Technical Skills:

- Programming Languages: Python, SQL
- Libraries/Tools: Pandas, Scikit-Learn, Git, Docker
- Data Visualization: Tableau, Power BI
- Data Handling: Excel
- Concepts: Data Visualization, Machine Learning, Problem Solving

Experience:

****Data Scientist | XYZ Analytics | 2021 – Present****

- Built classification models using Scikit-Learn that improved prediction accuracy by 15%
- Automated data analysis pipelines in Python using Pandas
- Created dashboards in Tableau to communicate insights to stakeholders
- Collaborated with analysts to define KPIs and track metrics over time

Education:

Bachelor of Technology in Computer Science
ABC University, 2020

Certifications:

- Tableau Desktop Specialist
- Microsoft Power BI Fundamentals
